

No chemicals & reverts back into Oxygen

ODOFREE SERIES

- The Air/Aquazone Odofree is a multipurpose machine designed to eliminate bacteria in both the air & water purification processes by using ozone technology.
- The Odofree disinfects and deodorizes those unwanted foul odours in the air caused by bacteria.
- Used in water purification the Odofree creates ozonized water which is an extremely powerful oxidant, that removes iron, manganese and chlorine from your water supply.
- The Odofree pumps ozone through a 6 mm pipe which means the ozone can be introduced into enclosed areas such as a fridge, vehicle, drain, air con ducting etc.

INDICATIONS

- Deodorizes
- Disinfects
- Kills smell of smoke
- Neutralizes ethylene
